# Webinar Tips and Notes

- Your phone &/or computer microphone has been muted.
- If we do not reach your question, please contact your regional TRC. There may be delays in response time:  
<https://telehealthresourcecenter.org/contact-us/>
- Please fill out the post-webinar survey.
- Closed Captioning is available.
- Please submit your questions using the Q&A function.
- The webinar is being **recorded**.
- Recordings will be posted to our YouTube Channel:  
<https://www.youtube.com/c/nctrc>

the **H**AVES and the

**H**AVE-NOTS

**Disparities in Telehealth Availability in Rural Hospitals**

# Association of Telehealth Technology and Financial Performance in Rural Hospitals

The Rural Telehealth Evaluation Center (RTEC) is funded by the Federal Office of Rural Health Policy (FORHP), the US Health Resources and Services Administration (HRSA) (Grant # U3GRH4001) to conduct evaluation research on telehealth services, which aligns with Section 711 of the Social Security Act.

**Principal Investigator:** Saleema A. Karim, PhD

**Team:** Mick Tilford, PhD; Hari Eswaran, PhD; Corey Hayes, PhD; Leah Dawson, PhD; Cari Bogulski, PhD; Maysam Qadimirabbani, PhD.

## Project Leader

# AGENDA

- Defining **"HAVES"** and **"HAVE-NOTS"**
- Background
- Study Motivation
- Research Hypothesis & Objective
- Research Methods
- Results & Conclusions
- Next Steps

# the haves /hævz/

*noun* [plural]

## Definition of *the haves*

: people who have a lot of money and possessions : wealthy people

# the have-nots /'hav ,nəts/

*noun* [plural]

## Definition of *the have-nots*

: people who have little money and few possessions : poor people

# HAVES & HAVENOTS

**Books &  
Stories**

**Hollywood  
Movies**

**Television  
Shows**

**Researchers &  
Policy Makers**

# STUDY BACKGROUND – RURAL HOSPITALS & TELEHEALTH

Rural Hospitals make up >50% of all hospitals in the U.S. – providing essential access to inpatient, outpatient and emergency medical services in rural communities.

## CHALLENGES:

- ⦿ Low reimbursement rates
- ⦿ Reduced patient volume
- ⦿ Uncompensated care
- ⦿ Low profit margins
- ⦿ Limited access to technology
- ⦿ Difficulty recruiting and retaining providers
- ⦿ Increased reliance on Medicare & Medicaid reimbursement

# STUDY BACKGROUND – RURAL HOSPITALS & TELEHEALTH

Telehealth assists on expanding access and improve quality of **rural healthcare**.

Technology to help with the delivery of clinical healthcare services provided at a distance.

## **BENEFITS:**

- ⊙ Increase patient volume
- ⊙ Increase quality of care
- ⊙ Reduce costs by reducing readmission
- ⊙ Increase patient access to specialty care
- ⊙ Improve patient outcomes
- ⊙ **Increase patient revenue & decrease costs**

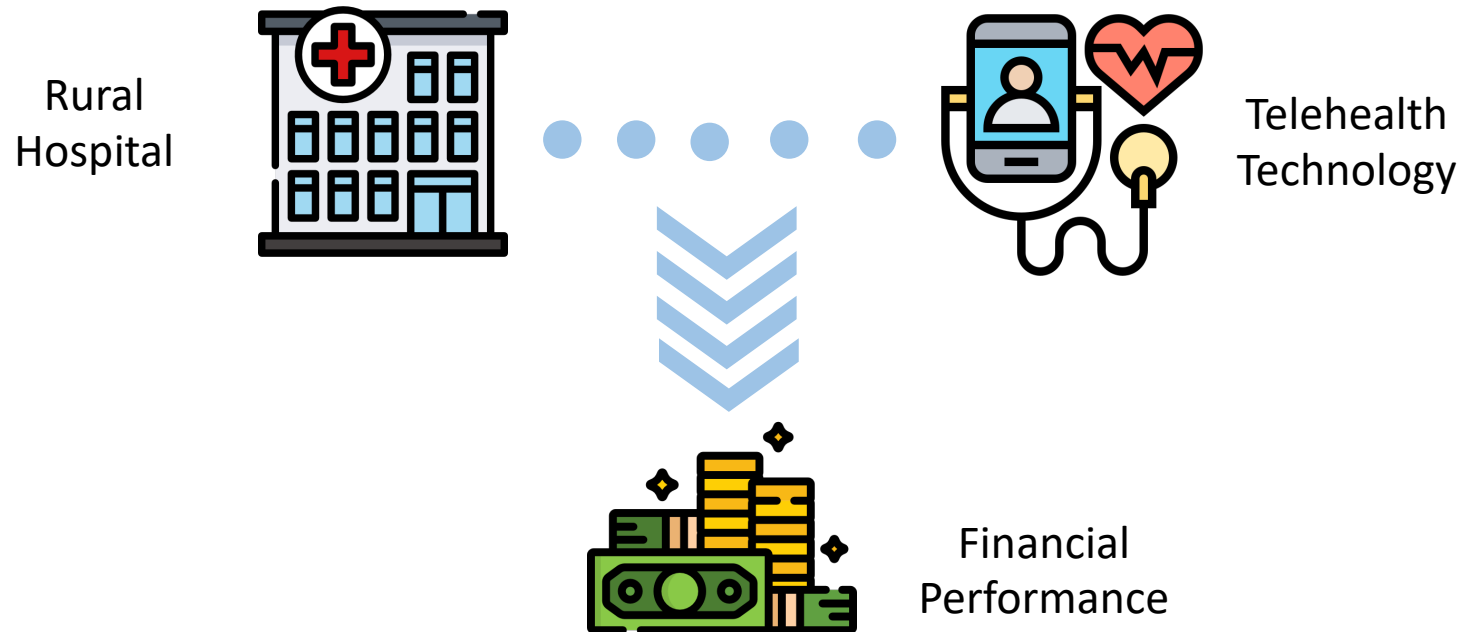

# STUDY MOTIVATION

## RESEARCH OBJECTIVE\*

To determine the association of **telehealth technology** and **financial performance** on rural hospitals.

\*FORHP & HRSA funded objective (Grant # U3GRH4001) to conduct evaluation research on telehealth services.

# STUDY MOTIVATION

& HAVE-NOTS

# RESEARCH HYPOTHESIS & OBJECTIVES

## **HYPOTHESIS**

Telehealth adoption in rural hospitals may be related to financial health, hospital and community characteristics.

## **OBJECTIVES**

This study investigates the relationship between financial, hospital and community factors and telehealth adoption in rural hospitals.

# RESEARCH METHODS

## DATA SOURCES

# RESEARCH METHODS

## HOSPITAL STUDY SAMPLE

**Rural Hospitals\***  
(2009 to 2019: 11 years)

### EXCLUSIONS

- Hospitals closed from 2009 to 2021.
- Hospital treatment group.

### INCLUSIONS

- Hospitals with 1-year days in period reporting (~365 days).
- Hospital “**Haves**” & “**Have-Nots.**”

\*Rural hospitals were defined as short-term general acute nonfederal facilities with special payment designations, as well as hospitals with no special payment designations located in a nonmetropolitan county or in a subcounty area with a Rural Urban Commuting Area codes of 4 or greater; this is the definition used by the Federal Office of Rural Health Policy as well as other federal programs.

Control  
(✗ Telehealth)  
"HAVE-NOTS"

# RESEARCH METHODS

## VARIABLES – DEPENDENT VARIABLE

### OPERATING MARGIN

Measure of hospital profitability from patient services.

### TOTAL MARGIN

Measure of overall hospital profitability from operating and non-operating sources.

# RESEARCH METHODS

## VARIABLES – INDEPENDENT CONTROL VARIABLE

### Hospital Characteristics

- ⊙ Hospital ownership
- ⊙ Patient mix (Medicare & Medicaid)
- ⊙ Hospital size (bed size)

### Community Characteristics

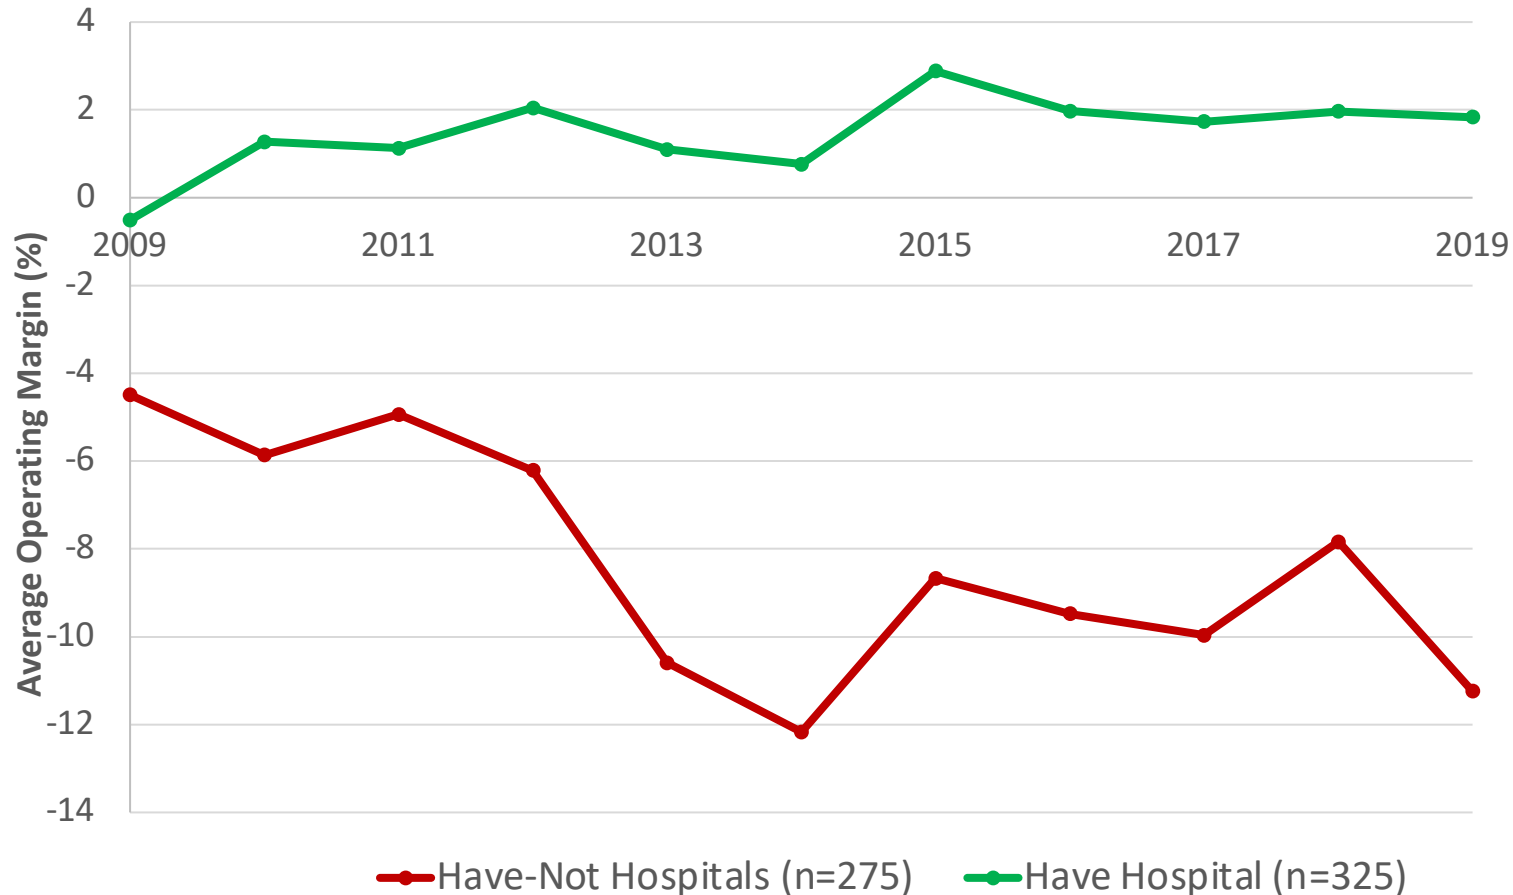

- ⊙ Percent seniors ( $\geq 65$  years)
- ⊙ Poverty rate
- ⊙ Unemployment rate
- ⊙ Per capita income
- ⊙ Population density
- ⊙ Hospital concentration

# RESULTS & CONCLUSIONS

## UNADJUSTED AVERAGE OPERATING MARGIN (%)

### Have Hospitals

- n=325 hospitals
- Average: 1.49%

### Have-Not Hospitals

- n=275 hospitals
- Average: -7.73%

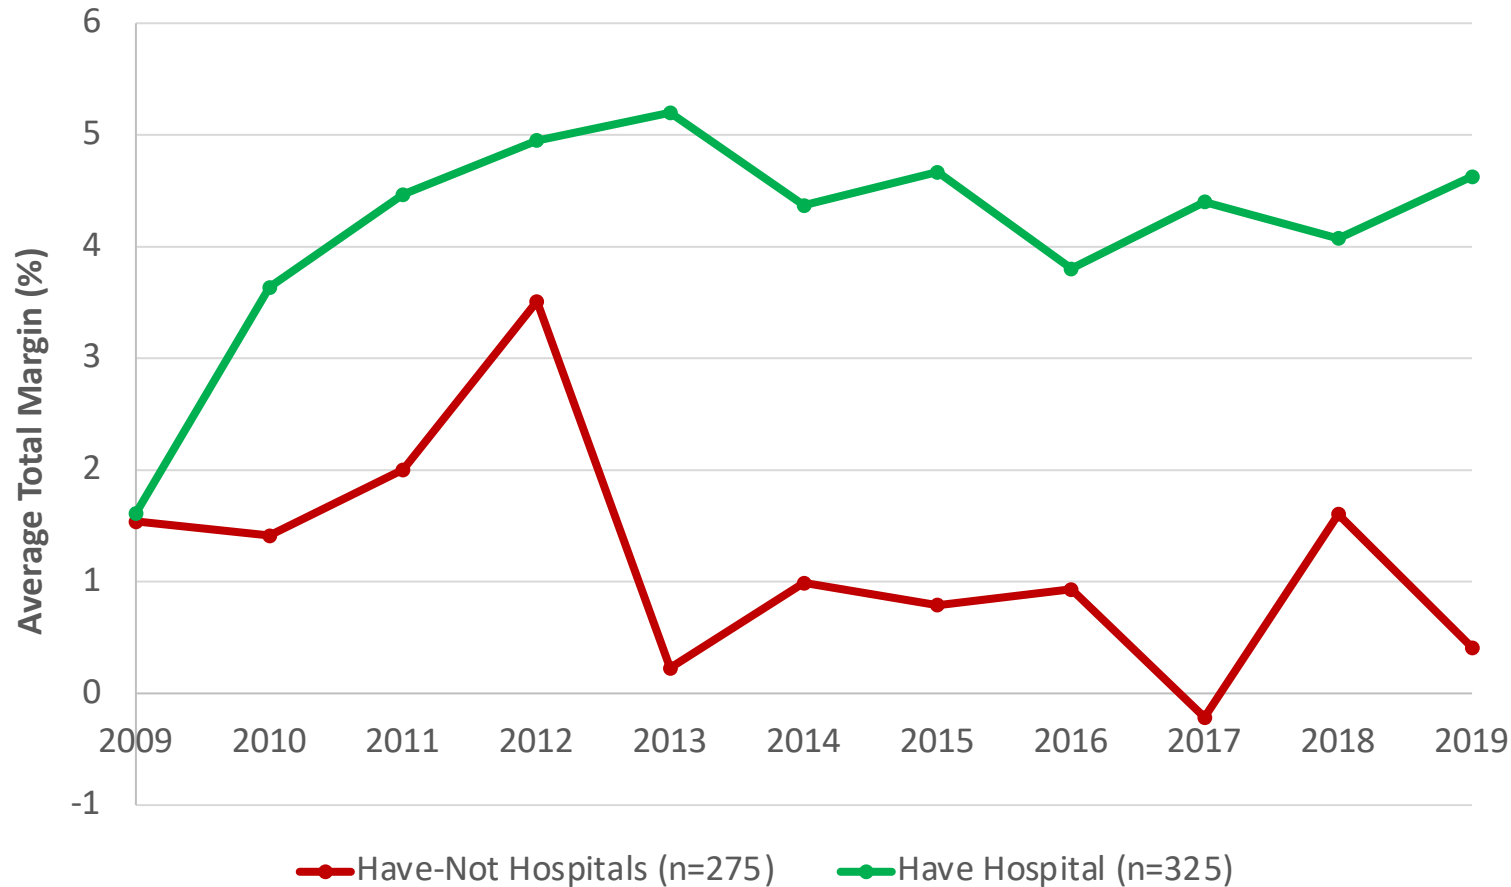

# RESULTS & CONCLUSIONS

## UNADJUSTED AVERAGE TOTAL MARGIN (%)

### Have Hospitals

- n=325 hospitals
- Average: 4.14%

### Have-Not Hospitals

- n=275 hospitals
- Average: 1.35%

# RESULTS & CONCLUSIONS

## HOSPITAL CHARACTERISTICS

Variables	Have Hospitals (n=325 Hospitals)	Have-Not Hospitals (n=275 Hospitals)	P value
Hospital Ownership (%)			
Not-for-profit	1,090 (65.0%)	386 (38.7%)	
For-profit	187 (11.2%)	168 (16.8%)	<0.001
Government	400 (23.9%)	444 (44.5%)	
Total Beds ( $\bar{x}$ , sd)	151.53 (239.1)	67.18 (121.2)	<0.001
% Medicare inpatient days ( $\bar{x}$ , sd)	46.25 (14.58)	52.44 (17.4)	<0.001
% Medicaid inpatient days ( $\bar{x}$ , sd)	10.9 (8.9)	10.3 (9.8)	0.121

*Have-Not Hospitals = 998 hospital-year observations; Have Hospitals = 1,677 hospital-year observations.*

# RESULTS & CONCLUSIONS

## COMMUNITY CHARACTERISTICS

Variables	Have Hospitals (n=325 Hospitals)	Have-Not Hospitals (n=275 Hospitals)	P value
Population density (persons per sq. mile) ( $\bar{x}$ )	547.3 (5,248.7)	308.4 (2,657.5)	0.181
Percent seniors (>65 years) ( $\bar{x}$ )	17.5 (3.9)	17.3 (4.3)	0.204
Unemployment Rate (%) ( $\bar{x}$ )	6.4 (3.2)	7.1 (3.2)	<0.001
Percent <65 years without health insurance ( $\bar{x}$ )	13.6 (5.4)	16.6 (6.5)	<0.001
Per capita income (\$) ( $\bar{x}$ )	\$41,181.7 (14,135.4)	\$37,952.9 (10,759.2)	<0.001
Poverty rate (%) ( $\bar{x}$ )	15.8 (5.5)	16.9 (6.1)	<0.001
Hospital concentration (# of hospitals in the county)	3.1 (7.9)	2.3 (3.5)	<0.001

*Have-Not Hospitals = 998 hospital-year observations; Have Hospitals = 1,677 hospital-year observations.*

# RESULTS & CONCLUSIONS

## LOGISTIC REGRESSION RESULTS [P(Y=HAVE | X<sub>i</sub>)]

Independent Variables	Telehealth Status: Haves Versus Have-Nots	
	Marginal Effects ( $dy/dx$ )	Standard Errors
<b>Hospital characteristics</b>		
■ Government hospitals <sup>a</sup>	-.17***	.021
■ For-profit hospitals <sup>a</sup>	-.16***	.029
■ Total beds	.00060***	.00010
■ Medicare patient mix percentage	-.0037***	.00070
Medicaid patient mix percentage	-.000094	.0011
<b>Community characteristics</b>		
■ Population density (persons per square mile) <sup>b</sup>	-.020*	.0086
Percent seniors (>65 years)	.0046	.0026
Unemployment rate (%)	.00073	.0042
■ Percent <65 years without health insurance	-.013***	.0021
Per capita income (\$) <sup>b</sup>	-.072	.058
Poverty rate (%)	-.0019	.0023
■ Hospital concentration (# of hospitals in the county)	.0042*	.0016

\* $P < 0.05$ ; \*\* $P < 0.01$ ; \*\*\* $P < 0.001$ .

# RESULTS & CONCLUSIONS

## ORDINARY LEAST SQUARES REGRESSION RESULTS

Independent Variables	Operating Margin (%)		Total Margin (%)	
	Marginal Effects ( $dy/dx$ )	Robust Standard Errors	Marginal Effects ( $dy/dx$ )	Robust Standard Errors
■ Hospital telehealth status (Have) <sup>a</sup>	6.92***	.54	2.18***	.41
<b>Hospital characteristics</b>				
■ Government hospitals <sup>b</sup>	-4.48***	.56	-.30	.40

# RESULTS & CONCLUSIONS

## VARIATION IN “HAVES” & “HAVE-NOT” RURAL HOSPITALS

Always  
“HAVES”

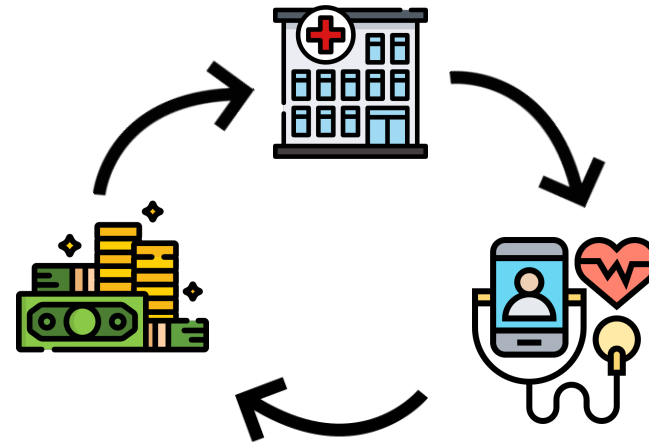

Control  
“HAVE-NOTS”

- ◎ Access
- ◎ Quality
- ◎ Outcomes

## CANNOT INFER CAUSALITY – TELEHEALTH ADOPTION & FINANCIAL PERFORMANCE

.....WHICH CAME FIRST?

# RESULTS & CONCLUSIONS

## STUDY LIMITATIONS

**1**

### Telehealth Identification

- Annual variation in telehealth definition & creating a dichotomous indicator.
- Hospital variation of telehealth status reporting.
- Missing data.

**2**

### Cost Report Data

- Hospital financial reporting >365 days (i.e., 450 days).
- Outliers in financial data.
- Missing data.

# NEXT STEPS

## YEAR 2

- Urban versus rural hospital differences in telehealth adoption – financial performance, market share, etc.

1

## YEAR 1

- Assess the association of telehealth adoption on financial performance of rural hospitals.

2

3

## YEAR 3 PROPOSED

- Telehealth adoption by rural hospitals during COVID-19 pandemic.  
[HAVE-NOTS pre-pandemic to HAVES during pandemic].

**THANK YOU!**

# Our Next Webinar

The NCTRC Webinar Series

Occurs 3<sup>rd</sup> Thursday of every month.

**Telehealth Topic:** TBA

**Hosting TRC:** Pacific Basin Telehealth Resource Center (PBTRC)

**Date:** July 21, 2022

**Times:** 11 AM – 12 PM (PT)

**\*Please check the NCTRC website for more information on the upcoming webinar.**

# Please Complete Our Survey
