Shriners
Children's™

Celebrating
100
YEARS

Shriners
Children's™

1922

2022

EXPANDING THE MISSION

1922

—
The first Shriners Hospital for Children opened in Shreveport, Louisiana, primarily to address the needs of children affected by the polio virus. Later, it began to offer a full line of orthopaedic care.

1962

—
After a vote at the 1962 Imperial Session, treatment for burn injuries was added to the health care system's care disciplines.

1980

—
The first spinal cord injury rehabilitation unit specifically designated for children opens at the Philadelphia hospital.

2005

—
The Joint Boards add cleft lip and palate to the official designated service lines.

2020

—
Since opening that first hospital nearly 100 years ago, Shriners Hospitals for Children has provided care for more than 1.4 million children.

WHO WE ARE

Orthopedic
Conditions

Burn Injuries

Spinal Cord Injuries

Cleft Lip and
Palate

WHERE WE ARE

Shriners Children's has 21 locations in the U.S., Canada and Mexico

OUTREACH EFFORTS

More kids, in more places

Global Community

Using technology, community partnerships, affiliations and additional access points, we can reach many more kids in need of our services, in many more places. We continue to increase our efforts to improve the lives of children by providing care outside of the walls of our hospitals and clinics, and beyond the borders of our three “home” countries.

International Patients

In 2019, 68 outreach clinics were held outside the U.S.

In addition to serving children at international outreach clinics, many come to our U.S. facilities for care. In 2019, 17,698 patients from 124 countries were treated at Shriners Hospitals for Children sites in the U.S.

U.S. Patients

Our primary locations also hold outreach clinics within their local areas. In 2019, 232 outreach clinics were held in the U.S., helping to reach and care for children closer to their homes.

Shriners Hospitals for Children is committed to providing care to as many children as possible, regardless of where they live.

RESEARCH

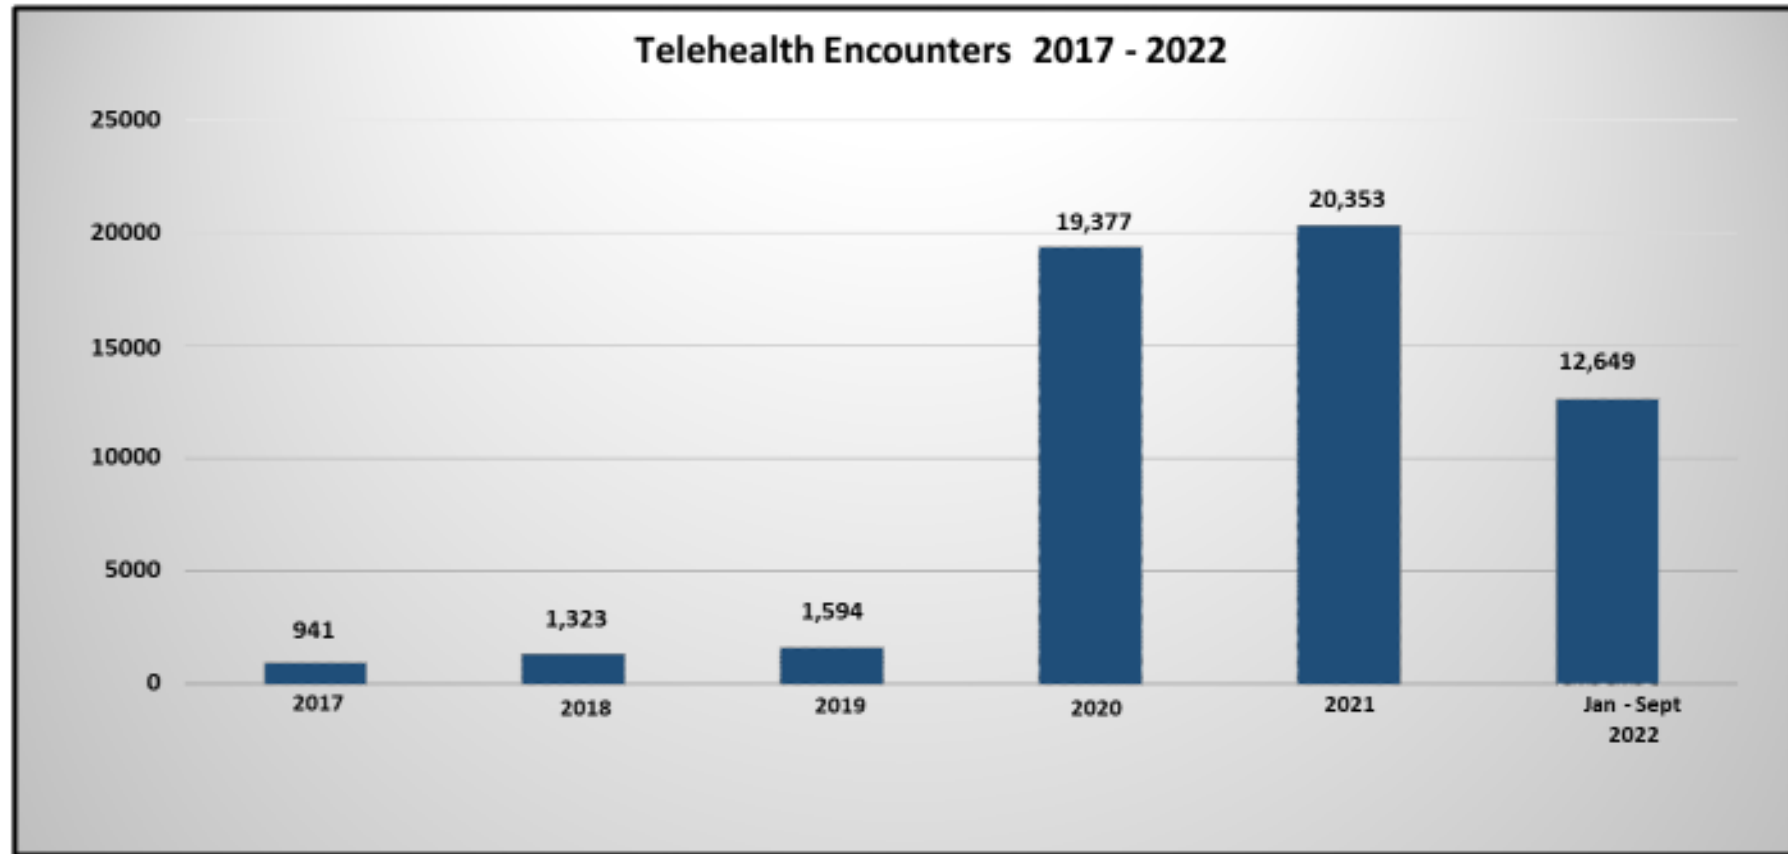

Shriners Hospitals for Children is committed to conducting high quality, innovative research in the areas of burns, orthopaedic/ musculoskeletal and neurological injury and disease in order to improve the care and quality of life of children with these conditions and challenges.

Our research staff is affiliated with several renowned universities, including Harvard University, Oregon Health & Science and the University of California.

Metrics

Challenges

- Multiple Sites
- Culture/History of Program
- Adoption
- Support

Growth Strategies

- Number of Participating Providers
- Ancillary Services Use Case Scenarios
- International Cases
- Site Specific Goals

Sustainability

- Deeper EHR Integration
- Work Flow Process Simplicity
- Satisfaction Orientation
- Educational Opportunities
